

Hi All,

The Hands-on, Saturday, March 21, 2015, 9:00 AM, will be making bottle stoppers. I have handouts for turning bottle stoppers with a cork and with a metal end. If you want to get one before the hands-on session, go to Woodcraft.com and enter **111191** in the search bar, then click on **ARTICLES** and you will find the instructions for the cork bottle stopper and a lot of good information. For the metal bottle stopper, enter **144631**, (product number for one type of bottle stopper), then scroll down and select **INSTRUCTIONS**, click on [Wine Bottle Stopper Kit - Click to Download](#)

The instruction number is **77B92**. From there you can download the instructions and print them out if you want to.

Another good reference - www.woodturningonline.com Bottlestoppers - scroll down to Berea Bottle Stopper - Hybrid Turning Instructions by Ed Davidson. This gives you another method of turning the metal bottle stopper. There is a lot of info on bottlestoppers here. Check it out.

Hope to see you on Saturday.

Thanks,

Dotty Pugh
