GAST ROTARY VANE AIR PUMPS
At each scheduled maintenance, inspect, clean or replace or repair the pump
for these steps. Cover exhaust with a cloth when the pump is running.
Always introduce GAST AH255D FLUSHING SOLVENT into the pump
while it is running. Operate pump for one minute. Repeat procedure
until performance is restored. For all lubricated pumps, use the same
type of GAST ACCESS LUBRICATING OIL in the same way.

GAST AIR MOTORS
Inspect the air intake filter. Wear eye protection for the location
of the pump. Do not breathe the air. Do not use the pump in a
confined space. Do not use the pump in a flammable atmosphere.
Always use the pump in a well-ventilated area. Do not use the pump
in a confined space. Do not use the pump in a flammable atmosphere.
Always use the pump in a well-ventilated area. Do not use the pump
in a confined space. Do not use the pump in a flammable atmosphere.
